

Title: Autonomous Vehicle & Its Challenges

1. Global Scenario of Autonomous Vehicle (AV) Research
2. Research status of Self-Driving Car in Industries and how Researchers can quickly prototype the Environment
3. How AI/ML helps to implementing intelligent algorithms for safe and efficient autonomous driving
4. With the help of augmented and mixed reality how most challenging environment can be created in the lab scenario.
5. Skills required to face this challenges in AV; Solutions for Engineering Lab on AV.
